"Annie Laurie"

With Lillian Gish

A thundering drama of the Scottish Highlands. Pictureque—powerful—a drama as romantic as the race it tells of.
A great, smashing drama—and a spectacle of never-ending wonder.
Lillian Gish as a goddess of the Scottish Highlands. The romance of fable and song—the surge and thunder of battle—and a love tale sweet as the Scottish Heather.
Note, Janet McIlvanna in person on Saturday night, May 11th with above picture, singing Scotch songs. The girl with the golden voice.

Band Prospects Very Bright

The meeting held in the new community hall on Saturday evening was well attended and great enthusiasm prevailed. Already twenty-one players have reported, the majority of whom have their own instruments, and there is every prospect for one of the best of bands. This movement deserves generous support from every quarter, which will undoubtedly be given in full measure.

Champion Chatter suggests steps should be taken to stop the pilfering of cars left on the streets. In last year's financial statement there appears an item of \$45 for a constable. Surely an official receiving such a princely salary as this should be able to keep an eye on the cars in addition to any other duties that come his way.

While there has been considerable delay owing to the heavy rains rapid progress has been made in every direction with seeding operations and it is estimated that at least 75 per cent if not more of the crop is now sown. The grain has gone in the ground in splendid condition and rapid growth may be looked for.

Nathan F. Leopold Sr., last of three fathers, bowed under the tragedy of the Bobby Franks kidnapping is dead. Loeb Sr., died in 1924, and Franks died after the tragedy. All were prominent in Chicago life up to the killing of young Franks, but they lived in seclusion thereafter.

The new hall was filled to capacity on Saturday evening for "The Trail of '98," and the show was generally enjoyed. The enlarged accommodation for patrons is permitting the management to introduce high class pictures, a feature they are taking full advantage of.

Alston Junior U. F. A. have a big dance planned for Wednesday, May 15th. Len Davis Arcadians will furnish the music and lunch will be served in the basement. Every effort is being made to provide a real good time for everyone who attends.

Wednesday, being the first occurrence of this day in May was observed as a half-holiday in Champion by the stores. The half-holiday will be observed during the summer until the busy fall season begins.

A prominent local bridge player announced last week to a party of friends that she had discovered where her husband had been spending his evenings. She stayed home one evening last week and found him there.

With everybody at work in the country it has been fairly quiet in town for the past few weeks. As the farmers complete seeding things are becoming normal again.

A plane which flew over the Anderson Bros. land and the town recently was owned by that firm and was making the trip from Calgary to Lethbridge.

See the massacre of Glencoe, when the Campbells killed nearly all the MacDonalds, at the "Annie Laurie" picture, Thursday and Saturday, May 9th and 11th.

Women's Institute Enjoys Outing

The W. I. was entertained on Wednesday afternoon at the home of Mrs. Guy Dow. Bridge and whist were played, Mrs. Watts and Mrs. Ryan being the prize winners in the former while Mrs. Woodhull and Mrs. McLenn were the winners at whist. Dainty refreshments were served and thoroughly enjoyed. Mrs. J. N. Beaulieu was the convener at this meeting and was assisted by the W. I. executive and others. The ladies who served lunch were Mrs. Bastin, Mrs. Hummel, Mrs. Alexander, Mrs. Hoskins, Mrs. Beaulieu and Mrs. Wise. Mrs. Dow assisted the ladies. Mrs. Beaulieu provided or donated the prizes which were very beautiful some coming from a long distance. The event was very much enjoyed and it will be interesting to know that the ladies are planning on having a series of these outings.

Champion Elks Sports and Carnival—July 1 and 2.

Rattlesnake oil, made from boiled down rattlesnakes, is considered in the southern part of the United States to be one of the most valuable cures for rheumatism.

The carnival features of the Elks' celebration on July 1 and 2 will be particularly attractive this year, some real novelties being introduced for the first time. Save the dates for Champion.

Tree planting is actively under way in all parts of the town, clean up operations accompanying this activity. In a short time all the premises in town will be ready for inspection.

A new assessment of the Municipal District will be made this year, which will be used for three years instead of five years as formerly.

Born—On Sunday, April 28th, at the home of Mrs. James Matlock, to Mr. and Mrs. Wade Matlock, a son.

"Underworld" is the most powerful realistic-absorbing creek story filmed. It takes you to the haunts of the human birds of prey, to the refuge of the hunted. This Saturday night.

Flies or Babies. Which?

The above arresting title to a brief but very telling little pamphlet issued by the Metropolitan Life Insurance Co. gives a very real meaning to the "Clean Up" week which is being urged on all communities at this season.

Fifth and garbage of all kinds accumulate during the winter months. With the coming of the warm days the house fly appears. It is born in filth, lives in filth and when not busy on butter, milk, preserves or the baby's bottles, is feeding in filth.

It is estimated that the flies are responsible for more deaths than any single known disease. Babies are its particular prey since the infantile diseases are carried largely by the pest. Get rid of it by cleaning up all filth and garbage. Make a habit of burning all refuse. Give it no chance to breed. Screen doors and windows at the first hint of warm weather. Two flies at the beginning of the season will be responsible if allowed to live, for millions of other flies, they breed so rapidly. So clean up, burn up and screen doors and windows. Is it to be flies or babies? The choice is yours.

For literature on the summer care of babies send to the Canadian Red Cross Society, 407 Civic Block, Edmonton, Alta.

We want to know your reaction to this!

YOU'LL undoubtedly see and read the spectacular full-color advertisement in this week's **Saturday Evening Post** headed, **HAVE YOU LEARNED TO JUDGE CLOTHES-VALUE BY THE CALENDAR?** And when you read it, you're bound to have some positive reaction. Because every man faces the problem of how to buy clothes. And this advertisement goes to the very heart of the problem!

It is one of the much discussed series of personal messages from Alfred Decker, president of Society Clothes Limited. And in our opinion, there has never been a sounder argument advanced in the cause of good clothing. But naturally, we're a Society Brand store—and maybe we're prejudiced. That's why we want to know what **you** think about it. When you drop in to see our new Spring showing of Society Brand, let's talk it over.

THURSDAY, May 2, 1929

NOTES AND COMMENT.

The latest rain was another snaker. Outside the short delay which occurred in seeding operations it was all to the merr.

There will be a local option vote at Travers on Wednesday, May 10th, with Jas. Sallows as returning officer. There has not been a license at Travers previously, so it is evident the dries are anticipating any attempt at securing a license by submitting the plebiscite.

Fish, principally suckers, have run up the Little Bow river this spring in great numbers and have been easily caught by those who desired them. At the irrigation ditch too, both suckers and pike are present in unusual quantities, entering the ditch when the water is running.

The oil well is certainly worthy of a visit. The completeness of the arrangements for handling the heavy bits and other drilling tools is really marvellous, and the quantity of material and machinery involved will surprise anyone who has not visited a drilling outfit before.

There have been instances in this country where prayers for rain were in order. We are rapidly nearing the place where prayers for no rain will be needed and of even of a more effectual kind than were used in the other case.

Many farmers regretted all their seeding was not completed before the first rain. What is left may still be regarded as a matter of regret and still it may be as good or better than the early sown grain—not to intimate that it is a good idea to sow late.

"Only a few miles from Vulcan" lies the town of Champion and it seems to bother Vulcan somewhat when oil wells are under discussion. The operators of the Champion well, however, refuse positively to move it to Vulcan for some reason or another.

If one may judge by appearances co-operation is growing on the farms and getting further away every day in the towns and villages.

There is considerable difference of opinion as to the percentage of crop sown in this vicinity, but most of the figures hover between fifty and sixty per cent. Acreage of other grains besides wheat would appear to be largely increased in the farmers' plans.

With the decision of the Elks to celebrate July 1 and 2 in Champion, the ordinary citizen may sit back with a breath of relief. Everyone is of the opinion the Elks will do the celebration proud and at the

same time will say "Let the Elks Do It."

The mayor of the town regards the Chronicle's suggestion that the area in which trees were planted was confined too closely to one portion of the corporation limits as a "slam." At the utmost it was a mild one and should not be taken so seriously. If it was not a reasonable suggestion there could be no very great harm in it. To regard it as a "slam" might lead the public to from the conclusion that there was something wrong with the council's tree planting activities.

The municipalities along the road leading from Lethbridge to High River via Barons, Camangay, Champion, Vulcan and Brant are to hold meetings at once to consider joining with the provincial government in building a gravel road between the points mentioned, the cost to be borne equally, the government providing for maintenance after the highway is completed. While it would be much easier for the municipalities concerned if the government undertook the whole matter it is almost certain that the construction of such a road would cost the municipalities involved no more, or possibly less, than is now spent in maintenance and there would be an all weather road instead the present rather rough one. There is some feeling that such a highway would have a prejudicial effect on the business done in local towns, providing better means of reaching outside points, but it is doubtful if this would be the case any more than it is now. It is understood that all the municipalities through whose boundaries the road will pass must join in the movement in order to secure the assistance of the provincial in the project. It is believed, however, that there is every hope of securing unanimous adoption of the offer by the district concerned when the matter is gone thoroughly into. It would certainly divert an enormous amount of tourist traffic to the proposed route.

Extensive investigation of the bituminous sand deposits in northern Alberta will be undertaken shortly as the first step in the two-year program of development of this valuable Alberta resource by the Scientific and Industrial Research Council of Alberta. The work will be conducted under the direction of Dr. K. A. Clark of the University of Alberta who for the past several years has devoted much time to investigations along this line. The two year program of tar sands development is an additional feature of the Alberta Government's comprehensive plans for northern development. Keen in

target is also being shown in the soil survey under the direction of Dr. Wyatt, the water survey carried on by Dr. Rutherford and the Pre-Cambrian mineral survey to be conducted by Dr. Cameron during the coming season.

Co-operation on the part of the Alberta Government was assured the members of the Royal Radio Commission at their session in Edmonton during the past week. "The government of Alberta" stated Premier Brownlee, "is ready and willing to enter into negotiations with the government of Canada and the governments of the various provinces with a view to the organization of radio broadcasting on a basis of public service by some method that may be mutually agreed upon by the said governments."

Bills authorizing the construction of the Canadian National Railway branch lines from St. Walburg, Sask., to Bonnyville, Alberta and from Alliance to a point near Youngstown were passed at the Dominion House of Commons on Thursday. It is expected that construction will start at an early date on these lines which will open up large areas of productive land.

EVERYTHING IN HARDWARE

World-Famous, Three-Fuel Hart-Parr 18-36

In official tests, conducted by nationally known engineers, who used cheap distillate for fuel, the great Hart-Parr 18-36 registered a drawbar pull of 5,535 pounds at two miles an hour, and 4,975 pounds at three miles an hour. On the belt it easily pulled the amazing load of 43 horsepower. The Hart-Parr is a three-fuel tractor, burning gasoline, kerosene or distillate equally well. It is the one tractor that develops its power from the cheapest, low-grade fuels. Hart-Pars are made for small, medium or large farms and have three forward speeds to speed up hauling and field work. Drive one yourself and experience the thrill of controlling tremendous power.

Importance of

Thinning Vegetables

(Experimental Farms Note)

Beginners in vegetable gardening are almost sure to make the mistake not only of sowing seed much too thickly, but also of leaving the plants too thick in the row. A very large amount of seed is wasted each year because of this and failure to have plants develop properly is another result of more consequence to the sower of the seeds than the waste of seed. Thinning of all vegetables is desirable as soon as the plants are large enough to catch hold of, that is, quite small. Lettuce can be used even though the plants are thick, but to have satisfactory individual plants of leaf lettuce the plants should be thinned to five or six inches apart, and the plants of head lettuce should be thinned to eight inches or more apart. They will not develop satisfactory heads if much closer than this. It has been found in the Horticultural Division, Experimental Farm, Ottawa, that the larger varieties of head let-

tuce give the most satisfactory results when the heads are nearly one foot apart. Carrots should be thinned to about an inch and one half apart, beets to two inches apart, parsnips to two inches apart, onions to one inch apart, spinach four to six inches apart. Radish if sown rather thinly are thinned as ready for use. Often too many kernels of corn are left in a hill. Five plants are quite sufficient to leave after the cutworms and birds have taken their toll. Bean plants should be from two to four inches apart, and peas about one inch apart.

Vegetables will not develop satisfactorily if the plants are thick, hence judicious thinning is very important.

Ottawa, Canada's smelt fishery, prosecuted in Atlantic Coast waters only, is the biggest in the world, yielding annually about 75 per cent of the total world production. In 1928, unreviewed statistics of the Fisheries Branch show, 9,796,700 pounds of smelt were landed by the fishermen of the Maritime Provinces and Quebec, or 2,546,800 pounds more than in 1927. New Brunswick led in catch

Smelt are marketed fresh or fresh frozen and very large quantities are exported to the United States. Out of the 1927 catch of 7,351,000 pounds 6,155,800 pounds were sold on the American market.

An American lawyer was sitting at his desk one day when a Chinaman entered.

"You lawyer?" he asked.

"Yes. What can I do for you?"

"You good lawyer?"

"I hope so."

"How much you charge if one Chinaman killum 'nuther Chinaman to get him off?"

"Some days later the Chinaman returned and handed down \$500 on the lawyer's desk. "All right," he said, "I killum."

CHAPTER XVIII.—Continued

Donald's heart ached for this man, whose great love for his wife was as passionate at this moment as when she was living. "How he loved her," he thought.

When Walnwright spoke again his voice was quivering. "You are the first person to whom I have spoken of my past; even Constance does not know." As he turned to leave Donald gripped his hand in silence, but with a pressure eloquent of heart-felt sympathy.

Andy had noticed Donald's heart-felt interest in Connie and had wisely refrained from accompanying him on his night visits. On this particular night Donald came into the kitchen whistling a lively air, his face wreathed in smiles. He slapped Andy heartily on the back as he asked him for a lunch. His gaiety was so pronounced that Andy studied him closely.

"You look 'ppy, Donnie," he remarked.

"I am, Andy; I'm the happiest man in the world." He finished eating, then sat staring dreamily at the smoke of his cigarette as it circled about his head. Andy discussed lightly on various subjects, but Donald did not seem to hear him. After he left Andy heard him singing merrily in his cabin.

"Strike me pink, but I do 'pega Donald has waked up! What a pair, what a pair!" he said to himself.

In the morning Donald rode north on the gas-car to the scene of logging operations near the upper lake. He left orders with the men bringing Walnwright's baggage to the station. What Connie's absence would mean was brought forcibly to him as he met the trapper, leading Pete and her pot deer down the trail to his cabin.

"Two hours later Connie and her father stood on the station platform.

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken well enable you to fight dread "Flu" which is sweeping rapidly through the whole country. The germs of influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerville's. Half a teaspoonful of Nerville's in water makes a most efficient gargle. The germ-killing properties of Nerville's quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure, to rub the neck and chest with Nerville's. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-increasing wastes. This combination treatment of Nerville and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Andy stood with arms folded. "Gone?" he yelled, "of course it's gone. Why in 'ell want you 'ere?" "I had to go up the line to look over some logs, and the car broke down," replied Donald bitterly.

"Of course," Andy with withering sarcasm, "the timber couldn't wait another day."

"Andy," asked Donald excitedly, ignoring the remark, "did Connie leave you her address?"

"Why the 'ell should she give me 'er address? 'Aven't you 'er address?" was Andy's uncommodious reply.

"No, I haven't. I know that they are going to England, and that it ain't."

Donald sat down dejectedly.

Andy's face softened. "Do you like her?" he queried.

"Like her? I love her!"

"In that case I don't see 'ow she didn't let you know where to find 'er," mused Andy.

"She doesn't know that I care for her," said Donald gloomily.

Andy's mouth opened. He seized Donald by the shoulder. "Do you mean to tell me that you let that girl get away from you without 'er knowing that you wanted 'er?" he demanded indignantly.

"Strike me 'undams," blazed Andy, "or 'all the blinkin' mutts in this 'ere world you—"

"Spec'ally failed by me for a moment. 'You let that dear little girl go away broken-hearted.'"

"Andy," interrupted Donald eagerly, "do you think Connie cares for me?"

"For a moment, as he looked into the face of his fiancée, Andy longed to tell him of the scene after his fight with Frank. But the promise to Connie sealed his lips.

"'Ow the 'ell should I know?" he mumbled.

"But," he added with fine sarcasm, "if 'one was ten cents a cubic foot, you'd be a multi-millionaire, you blinkin' pie-eyed alompoop—you—"

"He clapped a tragic hand to his brow. 'You give me 'a headache,' and muttering to himself, he trudged up the hill.

The next day Donald went to Vancouver. He scanned the registers in hotels, inquired at docks and depots, but no trace of the Walnwrights could be found. He walked the streets with a forlorn hope that he might meet them. The hearts of many sleep-er golden-eyed day were set fluttering that day as a tall, handsome young man subjected them to a close scrutiny.

Two days later he returned to the light. That night he switched off the light and sat by the open window looking out on a night of stars, with a new moon making a ghastly light on the lake.

An owl's scream, uttering a brave snarl. "When are you coming back?"

"Maybe never." She choked as she stumbled up the car steps.

As the train started to move Connie came to the rear platform. A small, pale figure she seemed to Andy as she strained her eyes toward the north in a vain hope that she would see Donald. Andy stood in the center of the track waving his hat until the flutter of Connie's little handkerchief vanished around a curve.

As the train roared through the cut, the last view of her loved valley flashed before her eyes. Her eyes, struggling, she clung to the brass rail and gazed with tearful eyes at the only home she had ever known.

As they passed the trapper's cabin the noise of the rushing train sent 'pega galloping nimbly about the pasture. With flying boots that tore up the sod he circled around the field, then came to the fence and with his beautiful head held high on the arched neck he looked with startled eyes at the speeding train.

With a gesture intensely eloquent, Connie flung out her arms. "Good-bye, Peggy! Good-bye!" he found her way to a seat and covered her face with her hands.

Donald flung himself from the gas-car and had caught moving. "Train gone, Andy!" he shouted.

Milk Exports

Canada exported over nine million dollars worth of milk and its products for the twelve months ended February 28, 1920, an increase of three million dollars over the previous corresponding 12 months.

A GREAT PUZZLE TO CAREFUL PARENTS

One of the greatest puzzles to the careful parent is to know just what medicine to give the little one. When the child falls ill with griping pains; is seized with cold or fever, refuses food or vomits what he has taken, when he cries a great deal and cannot get the sleep so necessary to the growing child, the parent is at a quandary. What is to be done on such occasions? As often as not there is not a suitable medicine in the house. The puzzle is what to give him to set him right quickly.

It is to meet such emergencies that Baby's Own Tablets were designed. These pleasant little Tablets quickly reduce fever, break up colds, relieve constipation and indigestion, and allay teething pains. They quiet the nerves and promote peaceful health-restoring sleep. They are trusted abroad by the youngest and most delicate babies.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Lobster Industry in Canada

Lobstering is a distinctive industry. In 1870, there were three lobster canneries on the Atlantic coast of Canada; in 1927 the canneries numbered 438, and gave work to 6,380 people; 30,000,000 lobsters is a normal catch.

An Oil For All Men.—The sailor, soldier, the hero of many a deed, the man, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Electric Oil a true and faithful friend. To ease pain, relieve colds, draw wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicine and be among those taken on a journey.

New Author: Could you use my story if I were to tell it to you?

Editor: No chance. But down a gallon of water to a pint and it would still be water, wouldn't it?

Little Helps For This Week

"I know the thoughts that I think toward you, saith the Lord, thoughts of peace and not of evil, to give you an expected end."—Jeremiah xxi. 11.

His perfect plan I may not grasp: Yet I can trust Love Infinite. And with my feeble fingers clasp The hand which leads me to the light.

My soul upon His errand roves: The end I know not, but God knows.

Every human soul has a complete and perfect plan cherished for it in the heart of God—a divine biography marked out which it enters into life to live. This life, rightly unfolded, will be a complete and beautiful whole, an experience led on by God and unfolded by His secret nurture, as the trees and the flowers by the secret nurseries of the world. We live in the divine thought. We fill a place in the great, everlasting plan of God's intelligence. We never sink below His care, never drop out of His counsel.—Horace Bushnell.

Weather Hides the List

Stratford Editor Finds It Most Widespread Article

What is the most read section of a newspaper? Sports writers will say their page; editorial men will press the claims of the editorial page; reporters will be certain to assert that they have first place with local stories, while we have no doubt that the lady editors will be quick to claim precedence for the women's pages.

All wrong. One day last week the weather, through an error, was left out of the paper, and we were more calls over the omission of that little item than anything else that has ever happened.

An Oil That Is Priced Everywhere.—Dr. Thomas' Electric Oil was put upon the market the thousand and fifth over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Preservation Of Eskimos

Tribute was paid to the Dominion Government, the Royal Canadian Mounted Police and the Hudson's Bay Company, for the splendid work being done for the preservation and the well-being of the Eskimos, by Ven. Archbishop A. L. Fleming, appointed recently to take charge of Anglican mission work in the Arctic.

Minard's Liniment—good for tired feet.

Many railways in Germany are being electrified.

It's folly to suffer long from neuralgia, neuralgia, or headaches when relief is swift and sure, thanks to Aspirin. For 28 years the medical profession has recommended it. It does not affect the heart. Take it for colds, rheumatism, sciatica, lumbago, Gargle it for sore throats or tonsillitis. Proven directions for its many uses, in every package. Every drug store today has genuine Aspirin which is readily identified by the name on the box and the Bayer cross on every tablet.

ASPIRIN

Aspirin is a Trademark Registered in Canada

Capital Invested In Irrigation

Construction costs of ten major irrigation projects, now operating in southern Alberta amount to about \$13,500,000, or an average cost of approximately \$31 per acre for the area of slightly more than one million acres.

Corns cripple the feet and make walking a torture, yet sure relief is the shape of Holloway's Corn Remover is within reach of all.

Floorwalker (rebuilding assistant for contracting a customer): Miss Jones, remember, in this establishment the customer is always right.

Miss Jones: "Well, sir, she said you were an old shark!"

COMPLEXION IMPROVED QUICKLY

CARTER'S LITTLE BLUE PILLS

Look for that pretty, rosy, clear, healthy complexion! Instead of spending many dollars on fancy creams and skin lotions, buy a box of Carter's Little Blue Pills and remove the complexion poison. Your skin will be quickly cleared, and your health improved. All Druggists and the Red Cross Dispensary.

FASTER! FASTER! FASTER!

FASTER! FASTER! FASTER!

In the sky and on the highways modern motors, developing greater power and operating at higher speeds, demand better lubricants. It is a better lubricant was developed to meet this demand. It is a better motor oil because it is made by better methods, from the best crude petroleum.

Produced by the Special Marvelube distillation process, it is free from injurious sulphur and early carbon. It has remarkable life, and because it is manufactured under the constant supervision of Canada's most expert refining technicians you are sure of unsurpassed quality and unending satisfaction.

Accret operators, the most exacting in actual service that is Marvelube because it has been proven in actual service that it affords long intervals between engine overhauls.

Marvelube enters another performance, lower engine life and longer before starting its long winter sleep in wintry cold. Thus does Nature give to the wild things of the forest an instinct unknown to man.

(To Be Continued.)

The longest railroad run in from Riga to Vladivostok, 6,500 miles. Minard's Liniment relieves pain.

Airplane On Submarine

Big Innovation Has Been Added To Italy's Newest Craft

Italy's largest and best equipped submarine, the Franco Testi, has been launched at the dockyards at Taranto. The submarine has two 3,000 horsepower Diesel engines of special design which can be used separately or together, and which give a surface speed of 19 miles an hour. Two electric motors of 1,000 horsepower each propel the submarine at a speed of ten miles an hour under water.

The submarine's artillery is one anti-aircraft gun and several machine guns. The submarine is to carry a seaplane in a large tube adjoining the turret, a big innovation in submarine technique. The tube is able to resist over 200-feet depth water pressure.

The submarine's artillery is one anti-aircraft gun and several machine guns. The submarine is to carry a seaplane in a large tube adjoining the turret, a big innovation in submarine technique. The tube is able to resist over 200-feet depth water pressure.

THESE SIMPLE RULES MAKE TEETHING EASY

Be careful of baby's diet during teething. Do not overfeed him. Watch his stomach and bowels and the first sign of indigestion, gas or constipation, give him a few drops of harmless lemon-juice-flavored Fletcher's Castoria. These simple rules are making teething easy on millions of babies—and their mothers. For over thirty years Castoria has been the trusted standby of mothers everywhere. It soothes watery, cross babies to sleep quickly and easily—and it's perfectly vegetable so you can give it as often as needed. It uses the power of castor oil better and more gently. For your protection, the bottle of genuine Castoria always bears the Fletcher signature.

Draws Attention To Peace River District

Has Reason For 2,000,000 People Says
General McRae
Major-General A. D. McRae will again draw the attention of parliament to the colonizing possibilities of the Peace River country. He visited that area last year which has more than confirmed his previously expressed opinion that 2,000,000 people can find homes for 400,000 farms of 240 acres each. General McRae will urge greater railway facilities, modern methods of preparation of scrub land and a national colonization and settlement policy extending over ten years.

Alberta is famous for its vast resources of coal, for the rapid development of its oil and gas resources, and for the extent of its unique deposits of bituminous sands.

The oldest steamship in the world is said to be the barge "Constance," built in 1723, and now in use as a training ship at Copenhagen.

Canada's Forest Products
One train car in every six in Canada is loaded with forest products.

When Pain Comes

For Troubles Due to Acid Indigestion, Acidity, Headache, Stomach Disorders, Gases, Nausea

What many people call indigestion is very often merely excess acid in the stomach. The stomach acids are over-stimulated, and food sourness is the result. The corrective is an alkali, which neutralizes excess acidity. And the best alkali known to modern science is Dr. Williams' Pink Pills for Pale People. It has been recommended by the highest medical authorities in the 50 years since its invention. One spoonful of this harmless,

These are youthful British settlers coming under the auspices of the British Immigration and Colonization Association. They are listening to a few words of welcome before they landed in Canada this spring from the Anchor-Donaldson Liner "Athens."

Soldiers' Settlement On Farm Lands

Veterans to the number of 21,369 have been settled on farm lands, with and without loans, under the Soldiers' Settlement Act, according to a report tabled in the House of Commons. No fewer than 6,652 of these men established themselves without financial assistance from the Government. More than 6,000,000 acres in all, at an average price of \$10 per acre, have been bought or homesteaded by the Vets.

SUNDAY SCHOOL LESSON MAY 5

WHAT HILKIAH FOUND IN THE TEMPLE

Golden Text: "Thy word is a lamp unto my feet, and light upon my path." Psalm 119:105.

Lesson: 2 Chronicles 34:1-32.

Devotional Reading: Psalm 137-14.

Explanations and Comments

The Temple Repairs Which Led To the Finding of the Book of the Law, verses 8-13.—When twenty-six years ago, Josiah turned his attention to the ruined temple and had it repaired. He placed in charge of the work the governor of Jerusalem, the chief secretary and the official historians. They handed over to him the high priest, the money which the people brought to the temple and gave to the Levites who were appointed to receive it. The overseers were Levites; other Levites encouraged the workmen with music; yet other Levites were scribes and officers and porters. The work was done faithfully and progressed rapidly.

The Finding Of The Book Of The Law, verses 14-18.—During the work upon the temple, Hilkiah, the priest, found the book of the law of Jehovah given by Moses. This is believed to have been the legal portions of the Pentateuch which had been forgotten by the Jews. Hilkiah found the copy in the temple and gave it to the scribe, Shaphan. Others hold that it was a new and restored edition of the Book of the Covenant prepared for the needs of the times, and brought forth now because Josiah was a righteous king and would enforce its decrees. Dr. George Adam Smith points out that it is precisely from a time onward when the style and phraseology which are characteristic of Deuteronomy begin to affect the literature of Israel.

The Effect Upon Josiah Of The Reading Of The Book Of The Law, verses 19-21.—After telling the king that the work upon the temple was progressing well, the scribe Shaphan brought to the overseers and the workmen put at work. Shaphan spoke and read the entire roll, according to 2 Kings 22:10. On hearing the words the king rent his robes in token of grief. He said to his chief eunuch, "Behold, 'great is God's wrath against us, because our fathers have not done as his voice commands.' If we would see the effect the book must

have had upon the susceptible soul of Josiah, we are advised to read chapters 22-26 of Deuteronomy ourselves with Josiah and his times in mind. The book contains explicit directions as to worship and conduct, and the penalty of national disobedience decreed was the loss of home and country. "For many generations to come should come, the sins of the fathers also would be visited upon the children. Could the doom be averted by speedy and complete obedience and penitence?" "It is not enough to read our Bible, its messages must be heeded. Learn and observe these words found in our old Bible:

When thou readest what here is writ, Let thy heart practice second it; So, twice each precept read shall be. First, in your books and next in thee.

The Care Of Books

Many women who take beautiful care of their clothing and their kitchen utensils, their linen closets and their refrigerators, are careless about those choicest treasures of the home—the books. We are all apt to stick books away in bookcases or on shelves and forget all about them except to whisk an occasional duster along the fronts of the shelves.

Books need just as much care as rugs, household linens, and fine leather shoes, if they are to enjoy long life and keep their shape and their freshness. Dust accumulates on book shelves almost more quickly than anywhere else in the house, or at least it seems to, perhaps because there are so many edges exposed to the sweeping dust particles.

The light wood or feather duster should be used daily, and, at least once a month, every book in the house should have individual care. Take it down and wipe off the cover and the tops and sides of the pages. Many little used books have a browned edge of the pages, which, which could be avoided if they were wiped off frequently. If you have choice leather-bound books in your collection, whether shopaholic, calf, or morocco, give them a light coating of pure nystafat oil at intervals to preserve the leather.

Keep all books out of the direct rays of the sun. This dries out the glue and tends to loosen the binding and will eventually fade all of the colored cloth covers. Another way to keep books in good condition is to see that they stand upright at all times, whether on the shelves, book ends or on the shelves. A book tipped sideways gets its covers pushed out of shape and tends to come apart. If books do not support each other by standing close together, a small spangled book end may be inserted here and there on the shelves. The way a new book is opened has much to do with its future health. By opening a few pages at a time and gently pressing them back, the books will not be broken nor will the glue and the stitching be strained. A

book that is grabbed and crunched open violently may be permanently injured.

Make Your Priming Coat

By a primary coat is meant the first, or primary, coat of paint or varnish on any surface of wood, metal or plaster. The first object of the priming coat is to stop most of the suction, present to a great extent in wood and plaster, so that the finishing coats will stand out with a uniform degree of gloss, or, in the case of flat-wall paint, with a uniform degree of flatness.

In this connection, please note that no such uniformity can be obtained until the porous nature of the surface, or suction, has been neutralized. In the case of metal surfaces the degree of suction, or porosity, is far less noticeable; therefore, such surfaces will naturally call for a different priming treatment.

The second object to be aimed at in the first class priming coat is the proper degree of penetration of the face, so that the paint will be to the greatest possible extent become a part of the surface—not merely a coat of pigment and oil spread out on top of, and insecurely bound to, the surface.

Bearing these objects in mind, the salesman will readily understand that a thick priming coat cannot possibly be a good priming coat. Why? Take the first object outlined above. If a thick priming coat is applied on wood or plaster the porous nature of the surface will suck away most of the oil from the paint, which, mind you, needs just this quota of oil to bind it and form a good film. The result is, that instead of having stopped the suction, you have merely superimposed another surface, porous in nature because it has been deprived of too much oil and insecurely bound to the surface for the reason that it has not been properly under our second support—the second object.

So we arrive at the natural and logical conclusion that priming coats on wood and plaster must be thin coats—it is almost impossible to get them too thin. If a priming coat can be said to be too thin, such a claim

GAULTS LIMITED
Winnipeg Edmonton

can only be advanced from the covering or hiding viewpoint—a defect which can be easily remedied by an additional coat. But if too thick a priming coat is applied, a dozen coats will not cover up the blunder, because it will be exposed by the almost inevitable result—peeling of the paint from the surface. When in doubt—thin priming coats.

Literature On Farming

Some Must Turn Deaf Ear To Educational Material Supplied

When one reads of the poor methods that are used in farming by a number of men who are engaged in that profession, one is tempted to wonder whether the enormous mass of educational matter that is being run from presses and the multi-graphs by the department of agriculture is reaching the proper quarters, or whether the farmer turns a deaf ear to the good advice and goes on with his dirty seed, his scrub herd, his rusty shoals and his unprofitable poultry run, out of sheer cussedness.

Tallest Building

Construction has begun on the Marine Building in Vancouver, which, when completed, will be the tallest building in Canada. It is 12 stories, towering 18 stories above the north-west corner of Burrard and Hastings Streets.

Dean (to Froth): "Do you know who I am?"
Froth: "No, I don't, but if you can remember your address, I'll take you home."

"Have faith in your fellow man," says a paragraphist. But be sure you get his signature on the dotted line.

TO READJUST CAPITALIZATION OF THE C. N. R.

Ottawa.—For the first time since the creation of the National Railway system, the government of the day, through a responsible minister, pledged itself to the policy of readjusting the capitalization of the public owned railway.

In the special committee of the House of Commons which deals with accounts of the National Railways, this question was discussed, and Hon. Charles A. Dunning, minister of railways, stated unequivocally that he regarded the recapitalization of the system as being of "very great importance" and that the government desired at the earliest possible moment to deal with it.

Curiously enough, opposition to the recapitalization of the National Railways arose immediately from Conservative members of the committee. R. B. Hanson, Conservative member for York-Sunbury, who has taken a leading part in the work of the committee, at once asserted that the carrying out of such a policy would bring demands for reduction in the rate of interest on the railway's debt, and that it was a very strong argument against any action being taken.

Mr. Dunning and Sir Henry Thompson, however, held out for the recapitalization, pointing out the innumerable advantages which would follow and asserting that only in this way could Parliament deal justly by the able and conscientious officials who are endeavoring to make the system a complete success and who find that their best efforts avail nothing in overhauling the needs of a huge, unwieldy and unprofitable capitalization.

Mr. Dunning introduced the subject and in the course of his remarks made it quite plain that the action probably would have been taken this session had it not been for the intervention of junior shareholders of the old Grand Trunk Railway who are seeking the right to sue the government for compensation on account of their securities.

He failed to inform the committee as to whether or not the government would permit these shareholders to take action in the courts, and it is commonly believed that a fiat will be issued and the case carried to the jury council.

Increase In Manufacturing

Products Of Prairie Last Year Much Greater

Winnipeg.—Manufactured products of the prairies during the past year exceeded the sum of \$27,000,000, according to J. W. Ackland, retiring chairman of the prairie division of the Canadian Manufacturers' Association, at an annual meeting of the association.

Utilization of the mineral wealth of northern Manitoba and Saskatchewan, and exploiting of Alberta oil resources promise tremendous increases in the industrial output in the three central provinces, he stated.

Starts Schedule May 19

Winnipeg, Man.—"The Confederation," Canadian National Railway crack passenger train operating from Toronto to Vancouver by way of Winnipeg, Regina, Saskatoon, and Edmonton, will go into service on May 19 from the east and on May 21 from the west. This train replaces the National which in the winter months runs between Toronto and Winnipeg.

Receives Fellowship

Saskatoon, Sask.—Dr. William Allen, professor of agricultural economics at the University of Saskatchewan, has had a fellowship conferred upon him which will offset the expenses of attending a conference of agricultural economists to be held during August in Devonshire, England.

Spain Denies Against Plague

Madrid.—A royal decree has been issued forbidding the importation of all classes of fresh fruits, plants and trees from Canada, the United States, Japan and New Zealand. The action was taken as a defence measure against insect plague.

Cable Is Restored

Halifax, N.S.—The Halifax and Bermuda cable, which has been down for some time, has been restored, re-establishing communication between Canada and the British West Indies, via Bermuda.

Win Empire Competition

King's Trophy In Rifle Match Goes To South African Cadets

Ottawa, Ont.—Cadets from South Africa won the King's Trophy in the rifle match in 1928, which was participated in by 35,000 boys from all parts of the Empire. Canadian cadets won this trophy in 1927, and finished second in 1928. The results have just been made public by the National Rifle Association.

Commenting on Canada's performance in the National Rifle Association report says: "Not only does Canada possess many more brilliant individual shots than any other country but she has a limited number of units capable of achieving very special distinction. When mass efficiency becomes the principal object of the many and fewer low scores have to be included in her national team, the return prize, the King's trophy will return to the Dominion."

While Canadian boys have lost the King's trophy they have had other remarkable success in the matches. They won 52 silver medals which are awarded for scores of 90 and 100 points, and 152 bronze medals for scores of 80 and 90. The rest of the empire combined won a total of only 124 of these medals.

Will Perform Election Duties

King George Desires To Carry Out Royal Functions

Bognor, Sussex, England.—The steady progress being made by the King in permitting the drafting of statutory proposals for future functions, and there is every prospect these will be carried out. Transfer of the royal court from Bognor to Windsor Castle before Whit Sunday, May 10, is contemplated in view of the King's expressed desire to carry out the duties of his office in connection with a general election. The King will remain at Windsor Castle until the political situation permits him to go to Sandringham in Norfolk, where the east coast sea air has always agreed with his Majesty.

"It is his Majesty's intention that a thanksgiving service for the King's recovery should be held in Westminster Abbey at the end of July, with similar services in other large cities.

Convict Train Travels West

Seventy Prisoners Are Sent To Stony Mountain Penitentiary

Winnipeg.—The convict train, bearing 170 prisoners from Kingston, Ont., to western penitentiaries, reached here recently. Seventy prisoners were landed, and transferred to Stony Mountain penitentiary, a few miles north of Winnipeg, while the remaining hundred continued the westward journey to Prince Albert penitentiary.

The convict train consisted of four steel coaches, the windows of which were heavily barred. Guards armed with rifles, were aboard the train, while during the stop here forty police officers were armed with carbines, stout guard.

The journey from the penitentiary at Kingston was uneventful, according to the prison guards.

Lucky Gold Strike

Ontario Farmer Makes Discovery

Matheson, Ont.—W. Rhoades, Peatty township farmer, has just finished digging a \$60,000 pot hole. As a pioneer on the land, he has been digging for gold for many years. He used dynamite to dig his pot holes. The first blast uncovered a great mass of gold, and he is now digging for more.

Rhoades sold his find for \$60,000 cash and a large interest in the property.

Large Liners Projected

London, England.—The Cunard line is considering the construction of two new super-Athenic vessels which would be the largest in the world. It was stated on reliable authority. The liners would have a displacement of 75,000 tons, length more than 1,000 feet and breadth of more than 105 feet. They would be equipped with 150,000 horsepower engines.

Message For American People

San Francisco, Calif.—Sir Rabindranath Tagore, Indian poet and philosopher, sailed aboard the liner "Thylo Mar" for India, via Hong Kong. His final words to the American public were the expression of a wish that his people "would rise above indignities and insults to impart some beauty to the latter days of the industrialization of the West."

Airmen Killed At Toronto

Machine Went Out Of Control and Crashed Near Flying Field

Toronto.—Neel Marshall and William MacKenzie, residents of Toronto, were killed when their aeroplane went out of control and crashed near the Leaside flying field.

It was reported that MacKenzie who had but recently been granted a pilot's certificate, was in charge of the Gypsy Moth plane, with Marshall, a qualified pilot, as a passenger. The plane was said to have been but 150 feet from the ground when it went out of control and crashed with such force the engine buried itself.

Calendar Expert At Ottawa

M. B. Cotworth Discussed Matter With Government Members

Ottawa.—To aid in the suggested establishment of a national calendar in Canada to control proposed calendar reform and its effect on the Dominion, M. B. Cotworth, of Rochester, N.Y., originator of the 13-month calendar idea, has paid a special visit to Ottawa. Mr. Cotworth conferred with Dr. O. D. Skelton, under-secretary of state for external affairs, and H. H. Catta, Dominion statistician, respecting his proposition.

ITALY DEMANDS EQUALITY AS TO NAVAL POWER

Geneva.—The problem of navy parity between France and Italy loomed out as a reef which might imperil the success of any five-power naval conference to reduce armaments.

Premier Mussolini is reported here as firm as a rock in his determination for Italy with France, both on land and sea. While France apparently fails to see the justice of such demands.

France thinks her communications with her extensive colonial possessions and her mainland open to two oceans are sufficient reasons for her having naval forces superior to Italy's.

This problem of satisfying Italy at least on paper to worrying delegates to the preparatory disarmament commission. Some are beginning to worry whether a real advance on the naval problem could not best be made by establishing first of all an understanding between the United States and Great Britain.

The Associated Press correspondent has received the impression that France would place no obstacle in the way of such a preliminary understanding if it did not affect her position in relation to other continents.

However, a high French authority voiced recently enthusiastic approval of the speech of Hugh S. Gibson recently, because it gave a magnificent impetus to relations in armaments as a whole.

This personality explained that France desired to hasten general reduction in armaments and hoped that delegates would even be able to submit a draft treaty to the September assembly of the League of Nations, thus permitting an international conference by 1930. This would involve a second session of the preparatory disarmament commission during the present summer, until which time he thought the naval question had better be adjourned.

MORE NORSEMEN FOR THE WEST

British Election In May

London, England.—Premier Lloyd George announced in the House of Commons recently the prorogation and dissolution of parliament for May 10, nominations for seats in the House on May 20, and polling on May 30.

This photograph was taken at Winnipeg upon the arrival of the first immigrant special train this season, over the Canadian National Railway, March 20. There were 205 broad-shouldered Scandinavians in a total of 360 arrivals, which included 22 women. Two trains, which included the first special day later, brought the total of newcomers up to nearly one thousand. At least half were Scandinavians. All the immigrants have been placed by the Canadian National Railway's Colonization Department.

A CHARMING PRINCESS

Princess Ingrid, only daughter of the Crown Prince Gustaf Adolf, of Sweden, whose engagement to the Crown Prince Frederick, of Denmark, has been reported from Stockholm.

Germany Wants Aerial

Bombs Abolished

But Objections Were Raised By Several Countries

Geneva.—The German proposal to abolish the use of aerial bombs in warfare was defeated before the League's preparatory commission on disarmament. Only five countries were in its favor—Germany, Sweden, Holland, China and Russia. Those against it included Canada, the U.S. and Great Britain, registered their objections with a rider that a negative vote was not to be interpreted as in any way authorizing the use of aerial bombs against civil populations.

Count Von Bernstorff, of Germany, pointed out the toll that could be exacted by bombing planes over Paris, Berlin and London, and said that this method of warfare was horrible and cowardly, because the combatants were protected by defensive appliances.

P. Sokol, of Poland, said no one would deny the horror of such methods but the conference had not reached that point and under the Kellogg anti-war pact was not likely to reach it. When war had been outlawed, it was logical to begin codifying rules of war, he remarked.

M. Litvinoff, of the Soviet, here interpolated that Poland was among those who last year rejected the Russian proposal for complete abolition of armaments.

Agrees With Gibson's Speech

British Government Shares Views On U.S. On Disarmament

London, England.—Sir Austen Chamberlain, British foreign secretary, told the House of Commons that the British government shares fully the hope and wishes of the United States government on disarmament as set forth in Ambassador Gibson's speech at Geneva.

"The government desires to take the opportunity to express its warm appreciation of the cordial conciliatory spirit shown by the United States in its proposals and to express its belief that in the same spirit and with the most earnest wish to reach a complete understanding it will consider the American suggestions," declared Sir Austen.

Sir Austen made his statement in answer to a question by Commander Joseph Kenworthy, Labor, whether Ambassador Gibson's speech had been called to his attention and what response his majesty's government proposed.

ANTI-SMUGGLING
TREATY MAY GO
TO ARBITRATION

Washington.—Terminating the diplomatic correspondence on the "Tin Alone" sinking, Canada replied to the United States rejoinder to the proposed arbitration of the sinking by a guards' gun fire on the high seas, as the Canadian schooner suspected of conspiracy against American liquor laws.

Hon. Vincent Massey, the Canadian minister, delivered to Secretary Henry L. Stimson, a note which is expected to reveal the Dominion's attitude to the "Tin Alone" case in particular, and the scope of the anti-smuggling treaty of 1924 in general.

It is generally accepted here that the United States wants the case to go to arbitration. It is expected Canada will accept arbitration.

The British government is sitting back and letting Canada fight the case because the ship is of Canadian registry. But the decision will affect far-reaching questions of territorial waters, and United States rights against the vessel.

The treaty was signed by Great Britain, and technically Lord Balfour would have the right to say who would represent the British Empire on the arbitration board. It is likely that a prominent Canadian will be appointed, however, and he will serve for the Empire.

It is suggested here that the former secretary of state, Frank B. Kellogg, may represent the United States.

Thyphoid Fever At The Pias

Severe Epidemic Believed To Be Caused By Water

The Pias, Man.—A typhoid epidemic to stamp out the outbreak of typhoid fever, which already has taken a toll of three lives, and stricken more than a score of persons in the little northern railway town at Mile 327, on the Hudson Bay Railway, are under way. Four doctors now are in the town; all residents have been inoculated, and the water supply has been chlorinated. Impure water is believed to have caused the epidemic.

Twelve of the stricken residents of the town have been conveyed to hospital in the Pias, while others are confined to the little hospital at Mile 327.

Organize Wheat Pool

Lincoln, Neb.—Wheat-railers of Nebraska and Wyoming to the number of 200 have effected organization of a wheat pool, giving it the name of the Middle West Market Association non-stock co-operative. The pool was formed to represent 13,000 wheat growers in the two states and was declared to be the largest in the middle west.

Air Survey Completed

The Pias, Man.—Arriving here, Captain Charles Button, pilot, and party have just completed an 8,000-mile aerial voyage, which took them into the northern wilds, far beyond Port Churchill. Motion pictures of the northern scenery and of the inhabitants, the Robinsons, were taken. This was the main objective of the journey.

H.B. STRAITS ARE OPEN FOR FOUR MONTHS OF YEAR

Ottawa.—Hudson Strait will be open for navigation for at least four months in the year. The report of the Hudson Strait expedition for 1927-28 tabled in the House of Commons gives the probable period as from the middle of July to the middle of November.

In his report N. B. McLean, officer in charge, says in part: "Taking June 19 as the opening date for the Strait, and November 10 when ice was first reported at Nottingham in 1927, as the closing date, we get a season of 120 days or practically four months, during which commercial vessels could have navigated with safety and without assistance of ice breakers."

A further indefinite period would be added, he continues, with the use of ice breakers.

Some doubt is expressed in the report that two years' observations are sufficient on which to base any accurate statement on the length of the navigation season.

The extremes of temperature are given as 15 degrees Fahrenheit below zero at Nottingham in January, and 50 degrees above zero in July, at Wakeham Bay.

Fog was noted on 39 days, and on 14 of these it was dense. Many icebergs were seen. They drifted down through Wakeham Bay and carried west along the north shore by the current and eventually met the easterly current on the south shore where they took them into the Atlantic.

Three direction finding stations in addition to those at Cape Hope, Adair, and Cape Zeehaan, which were recommended, and two ice-breakers, one based at Fort Churchill and the other at a suitable harbor in the strait.

"The knowledge that an ice breaker is available if necessary," the report states, "gives confidence to traders, owners and shipping interests generally."

Other recommendations deal with clearing the strait and providing a fuel base.

Observe Annar Day

Australa Commemorated Landing Of Troops At Gallipoli

Sydney, N.S.W.—Annar Day, set aside to mark the famous landing of the Australian and New Zealand troops at Gallipoli with the aid of strong naval forces on April 25, 1915, was fittingly commemorated in Australia.

At Sydney, the Federal capital, an impressive memorial service was attended by Premier Stanley Bruce and Governor-General of Australia, unveiled the commemorative stone of Australia's war memorial which will cost \$1,250,000.

CHAMPION CHATTER

Vol. 2

Thursday, May 25, 1922

No. 11

Published in the interests of the People of Champion and Farmers of the vicinity.
GEO. L. DEPUE, Editor.

EDITORIAL

The present-day shirt is an abbreviated garment that makes most women look shorter and men longer.

J. D. Hegerman has taken out a 14 ft. Die Harrow. Joe says he has heard a lot about our die harrows and he wanted the best.

Large, fat lady: "Officer, could you see me across the street?" Policeman: "Shure and legatory, lady, I could see you a mile or more."

We believe that there should be something done to prevent the pilfering of cars left on the street. Saturday night brought forth a new crop of these vandals.

How to Mark Your Tools
Cover the steel parts of

your tools, such as chisel, saw, axe, hammer, etc., with a coating of wax. Then scratch your name through this wax, with a nail. Now put just enough hydrochloric acid in these wax grooves to fill them. Let the acid stand in these grooves overnight. In the morning wash the tool in acidling water, then rub it vigorously to get rid of the excess acid. You will find your name etched right into the steel.

Have you seen and examined the new Chevrolet truck and coupe we have on hand? They are leaners, look them over.

L. Fath has rented his residence to a member of the oil well staff.

Rev. S. R. Hunt attended a meeting of the High River Presbytery at Blackie on Thursday.

J. D. Henderson is now the proud possessor of a handsome Hupp coupe, purchased through J. M. Moffatt.

I. Granlin's residence is being treated to a coat of stucco this week, the work being in charge of Alex. Rinaldi.

Be sure to attend "Go to Church" Sunday on May 5th. A musical program is being prepared for the service.

Miss Love, who has been here for some months, left on Wednesday for New Westminster, where she will reside in future.

A. Barbier returned from the Vulcan hospital on Tuesday. He has made very satisfactory progress from an operation and expects to be fully recovered in a short time.

Sam Fong recently installed a Frigidaire refrigerating system in his restaurant making this one of the best equipped eating places on the line.

U. S. Alexander is thoroughly overhauling the property he recently purchased and will make it into one of the most attractive residence properties in town.

Mr. and Mrs. Fred Blachly arrived in town from Vancouver on Wednesday and after a visit here will drive their car, which was left behind last fall, to the coast.

Lost—On road leading north west of Champion, license plate No. 61-801. Finder leave at Chronicle office or return to Otto Hagg.

Wanted—Four dozen Turkey Eggs for hatching. Leave word at Chronicle office.

Found—Firestone tire, size 410-21 and rim. Owner call at Chronicle office.

Phone Campbells for your perennial and annual plants now booking.

Alberta's Newspapers

(Calgary Albertan)

Not all the alleged "jokes" that have been cracked at the expense of the small town newspaper can be applied to the weekly press of Alberta. In fact, most of the so-called rural newspapers of today are in their little way excellent examples of modern journalistic methods, well written and carefully edited. Most of the flimsy about the small town paper are unfortunate legacies to which these publications are heirs. They are handed down from the days of the "Bugle" and the "Epiphany" and they belong with the two-gun cowpuncher and the dear, dead things of Wild West literature.

Today the editor of the small town newspaper in Alberta and the other Western provinces gives himself to his task just as devotedly as his colleagues on the city daily. In fact, the main difference between them in some cases is simply that the one is published weekly and the other daily. The weekly newspaper, of course, makes little effort to cover the world field—why should it since the news of the great world outside has been served daily by the dailies which come out from the city? But in the field of community affairs the country newspaper is the most important task to fulfill and for the most part it is fulfilling it well. Of course, the smaller the community the more difficult the answer to the all-important question, "What is news?" In the town of 300 or 400 population the item that Jack Thomson is painting his barn red is not really so very amusing; it is probably quite an event.

It is through the medium of the weekly newspaper that the local merchant is able to offer his wares to fellow-citizens and in return the newspaper will usually do its part in creating a community spirit by which

VILLAGE OF CHAMPION

Notice Re Health and Sanitation.

At the regular meeting of the Village Council held on Thursday, May 2nd 1922, the general sanitary condition of the Village was considered, and it was agreed that conditions were far from satisfactory.

Harry Smith (colored) attended the council meeting, and he decided to move to Champion and be prepared to do all scavenging necessary to be done in the town, the fact that Mr. Smith will be in town prepared to do any work of a sanitary nature, will do away with any excuse to the effect that proper help to do the work cannot be secured.

Attention of the residents of Champion is drawn to the fact that it is against all Public Health regulations to throw any kind of refuse, water or ashes in any lane or alley, and residents are hereby advised that such practice must cease.

The people of Champion are hereby requested to co-operate at once with the Council in a general clean up in the Village, and thus help to make Champion the cleanest town in Southern Alberta.

Barber Shop Hours

The undersigned hereby give notice that their respective places of business will close at 7 o'clock on every day of the week except Wednesday and Saturday.

On Wednesday closing will occur at one o'clock to accord with other business places.

Saturday night the shops will be open as usual.

D. W. HARPER
W. McINNIS

the merchant will benefit. It is through the medium of the weekly newspaper that the local, the provincial and often the national questions of the day are brought to the attention of the townsman and the farmers in the countryside and discussed by them as well as the editor himself so that councillors, legislators and ministers are enabled to gauge the fine shades of public opinion in various localities. The weekly editorial itself is a good measure of the calibre of the men who edit these newspapers. Their discussions are almost invariably sound and well reasoned and their arguments are respected in the seats of the mighty at Edmonton and Ottawa.

The day of the country newspaper published as a means of livelihood for the owner of a treadle press has gone forever and while the people of the smaller communities will continue to look to the daily newspaper for daily news of the province, the nation and the world they will be mistaken if they underestimate their weekly newspaper as a power in the community.

You will never forget Janet Melvina, singing "Annie Laurie" and other Scotch songs, at the picture show Sat. nite, May 13th. The girl with the golden voice.
